

Release Notes

Expanded Addendum

GEHRIMED now includes an expanded Addendum feature that enables the billing provider to update the CPT and ICD data associated with a GEHRIMED Encounter after signature along with text amendments to the signed encounter document.

Updating the CPT and ICD information in GEHRIMED will impact several different areas including:

Encounter Card: The primary CPT code on the Encounter card will reflect CPTs added or removed utilizing the expanded addendum.

Quality Measures: Updating the CPT and/or ICD information on the encounter utilizing the expanded addendum will update patient/encounter's Quality measure eligibility.

Billing Information: Two additional reports will be delivered when the Expanded addendum feature is enabled – the *Company Billing Report – Expanded Addendum* and *Group Billing Report – Expanded Addendum*.

ICD Billing History and HCC value indicator: The Billing History associated with ICDs on the patient's problem list will be updated to reflect ICDs added or removed utilizing the expanded addendum

Relative Value Units: Information on the RVU dashboard will reflect CPTs added or removed utilizing the expanded addendum.

Note: For complete information on the Expanded Addendum, see the Expanded Addendum Quick Guide

Enabling the Expanded Addendum

The Expanded Addendum feature is enabled and configured by GPM Support for your practice. Contact your GPM Support representative to enable the Expanded Addendum.

Comparison to the Standard Addendum

Previously the encounter addendum was a text only field:

The screenshot displays a 'PROGRESS NOTE HISTORY' section in the GEHRIMED interface. A modal window titled 'Add Addendum' is open, featuring a text input field labeled 'Addendum Text' and buttons for 'Close' and 'Add Addendum'. The background text includes patient information and medical history details.

Release Notes

Once added, the standard addendum will appear on the signed encounter in the text format entered:

Patient: PATIENT EXAMPLE DOB: 12/13/1946 (73 yrs) Insurance: gEHRMed E/M 1997 SALES [GPM]
 Facility: EXAMPLE FACILITY 1 SNF Encounter ID: 80905599 Template: gEHRMed E/M 1997 SALES [GPM]
 DOS: 12/10/2020 Visit: None

Release Notes

Once the Addendum is signed, each section is added to the Encounter Document:

The screenshot shows a patient encounter document for 'PATIENT, JENNIFER'. The header includes patient demographics (DOB: 12/07/1948, Encounter ID: 3090818), insurance (NEED A REALLY LONG INSURANCE), and facility (EXAMPLE OFFICE). Below the header are buttons for 'Download', 'Print', 'Quality Measures', and 'Clinical Summary'. The document content is divided into sections: 'HISTORY AND PHYSICAL (AMENDED)', 'HISTORY', 'Visit Type:', 'DIAGNOSIS, ASSESSMENT AND PLAN', 'CPT Codes: 99305', 'ICD Codes: 294.20 / F03.90: Dementia 99305', a signature block, 'ADDENDUM', 'Clinical: Example Text Addendum', 'Diagnosis and Assessment: CPT Codes: 99306, ICD Codes: 250.00 / E11.9: Diabetes', and a 'System Addendum' note about demographic changes. The document is signed at 11:55 AM on 01/25/2021.

Diagnosis and Assessment Addendum

On the Diagnosis and Assessment Addendum, update the ICD and CPT coding as you would for an unsigned encounter.

Current Document

The Current Document tab displays the signed encounter in its current state.

Clinical Addendum

The Clinical Addendum Tab is used to add text to the document under the **Clinical Addendum** header.

Facility Change Addendum

The Facility Change Addendum enables you to update the facility associated with the encounter, exactly as the changing the facility utilizing the “Change Criteria” If the CPT Restriction type of the facility is now changed, the CPT and facility must now align.
